

DARRIAN REDFORD

Software Engineer | Backend Developer | C# / .NET

Clearfield, UT | 801-739-0787 | darrian.redford04@gmail.com | linkedin.com/in/darrian-redford-dev | github.com/Xenny76

SUMMARY

Backend-focused Computer Science graduate (BSCS, Neumont University, 4.0 GPA) with hands-on experience in C#/.NET development, API testing, and client-facing software delivery. Comfortable owning a feature from requirements through documentation, with a track record of writing reliable, well-tested code in production and academic environments. Seeking an entry-level software engineering or backend role.

EXPERIENCE

Software Engineer Intern — BullzEye Golf Technologies, Inc.

Jun 2026 – Sep 2026

Salt Lake City, UT (Remote)

- Contributed to backend software development for a golf technology platform as part of a cross-functional engineering team.

QA Engineering Intern — Fullbay

Mar 2026 – Jun 2026

Salt Lake City, UT (Remote)

- Tested in-development API endpoints across 10+ services, identifying and documenting bugs and edge cases before release to reduce downstream QA cycles.
- Built a golden seed data fixture using Fullbay's own endpoints to reliably populate test environments, cutting setup time for other engineers' test suites.
- Authored endpoint documentation covering functionality, working vs. broken states, and known issues, creating a reference other teams used to track API readiness.
- Worked directly with backend endpoints in a production SaaS environment, strengthening API testing and technical documentation skills relevant to backend/.NET development.

Back End Developer — AmertechTowerServices, LLC

Jan 2026 – Mar 2026

Remote

- Partnered with clients to understand needs, translate them into actionable tasks, and deliver updates through completion.
- Coordinated work across internal teams and client contacts to keep timelines, priorities, and expectations aligned.
- Maintained thorough documentation (requirements, notes, outcomes) to support clean handoffs and repeatable delivery.

EngineLab — Neumont University Capstone Project

Oct 2025 – Dec 2025

- Built a .NET MAUI app in C# that models engine setups from parameterized specifications and outputs simulated performance curves.
- Designed modular simulation logic and structured configuration/presets, with results rendered via ScottPlot for interactive charting and comparisons.
- github.com/Xenny76/EngineLab

TECHNICAL SKILLS

Languages: C#, Java, JavaScript, JSON

Backend & Frameworks: .NET, .NET MAUI, Blazor, REST APIs

Tools & Practices: Git, GitHub, Debugging, API/QA Testing, Agile Project Planning

Other: WordPress, Figma, Data Modeling

EDUCATION

Bachelor of Science in Computer Science (BSCS) — Neumont University

Sep 2023 – Sep 2026

GPA: 4.0/4.0 Valedictorian

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Databases, Networking, Software Architecture, Distributed Systems, Software Engineering
